- Detailed description

## REALISM

- All essential layers of tissue can accept repeated sutures
- Soft skin with a similar drag and strength to human skin

## VERSATILITY

- Can be used alongside PROMPT Flex Birthing Simulator, by placing the trainer in front, to add further realism
- Quick and easy to set up during training sessions
- Clamps are provided to secure the Mediolateral Perineal Repair Trainer to the bench top
- Trainer is compact and easily portable

## CLEANING

- Should trainer require cleaning, use a soft damp cloth on the plastic parts
- Do not get material section of this trainer wet

## SAFETY

- This product is latex free

- Do not perform procedures without the trainer securely clamped to a work bench or training station
- Do not introduce liquid or gel to the trainer
- Ensure care when removing sutures. Using small sharp scissors or a scalpel and take care to only sever practice sutures and not integral stitching

## SIMULATED PATIENT

- Perineal Repair Trainers can be used with a simulated patient
- Used in conjunction with PROMPT Flex birthing models with a simulated patient

## ANATOMY

- Vaginal mucosa
- Hymenal remnants
- Posterior fourchette
- Perineal muscles (bulbocavernosus and transverse presented together)
- Perineal epidermis and dermis
- Anal mucosa and sphincter

## SKILLS GAINED

- Recognition of internal anatomy
- Tissue and needle handling
- Perform mock infiltration (administering local anaesthesia, we recommend this is done “dry”, without fluid)
- Deep musculature, subcuticular and superficial suturing
- Repair of 2nd degree perineal tear
- Pill rolling technique to determine classification of injury
