Practice and demonstrate standard bandaging procedures. Can be used to demonstrate the attachment of prosthetic devices. (NOTE: There is no embedded, palpable skeletal material). Includes the two arms - one is amputated above the elbow; the other above the wrist. Both arms are slightly extended in a patient-like position to facilitate bandaging. The compressibility of the material very closely duplicates actual experience with a patient. Includes an instruction booklet. Size: 26" x 18" x 13".
