Parameters

Quantitative unit ks

A simulated head of an 8-year-old child featuring realistic size and anatomy. Perfect for practicing airway management skills on pediatric patients. Attaches directly to the currently produced version of Resusci® Junior*. Realistic anatomy includes mouth, tongue, oral pharynx, larynx, epiglottis, vocal cords, trachea, and esophagus. Separate lungs for auscultation. Inflatable stomach bladder indicates esophageal insufflation. Practice suctioning and oral, nasal, and intubation techniques. Comes with neck adapter, lungs, stomach, chest plate, chest skin, and pump spray lubricant.

Includes training stand to mount head, pump spray lubricant, and hard carrying case.

Optional Accessories

- LF03621 - Infant Airway Management Trainer
- LF03623 - Infant Airway Management Trainer with Stand
