Cena bez DPH	2.884,00 Eur
Price with VAT	3.489,64 Eur

Parameters

Nursing simulators - filter	Dospělý
Quantitative unit	ks

Life/form® presents the only patient care manikin that actually resembles a geriatric patient.

- Lightweight
- Complete Range of Motion
- Fully Functional
- Visually Realistic
- Patient Transfer Techniques

The Geri™ Nursing Skills Manikin is ideal for preparing students for working with real-life geriatric patients, since it features an elderly appearance with skin wrinkles and folds. No other manikin on the market is so realistic and true-to-life. When compared to similar manikins, it features the best and most lifelike range of motion; Geri™ moves like a person, allows realistic patient positioning, and features nonpinching joints. Life/form® simulations are added for realism. The overall appearance of the manikin is female, however, removal of the wig and attachment of the male genitals converts it for male catheterization and prostate examination simulations. Excellent for all levels of health care education... from nursing assistants to medical students. Ideal for all OBRA required training. Full three-year warranty.
