SB20132 - Model pro periferní zavádění centrálních katétrů (PICC) Petr

Order code: 4107.SB20132

Cena bez DPH

1.570,00 Eur

Price with VAT

1.899,70 Eur

Parameters

Cannula, injection, puncturing - filter

Catheter insertion

Quantitative unit

ks

The only available teaching model which permits the practice of placing Peripherally Inserted Central Catheter Lines (PICC Lines). The rapid acceptance and use of PICC Lines creates a need to be able to properly teach this procedure. Peter PICC Line™ allows both the teaching and assessment of this insertion technique. This portable teaching model has translucent arm skin that allows the visualization of the anatomically correct cephalic, basilic, and median basilic veins. The axillary jugular, subclavian, and superior vena cava veins are also present, plus a movable chin simulates the occlusion of the jugular to prevent the PICC Line from taking this path. Palpable ribs permit practice in measuring proper catheter length to the correct intercostal space. The model also permits the measurement of catheter length outside of the body and the confirmation of proper placement by viewing the distal tip of the catheter in the viewable superior vena cava. Replaceable, barely translucent arm skin allows visualization of underlying veins. Includes soft carrying case. Includes user manual. A great tool for training and skill assessment. Blue veins are made of natural latex.
