Parameters

Pumping rate [l/min]	20
Threshold pressure [kPa]	1
Overpressure [kPa]	100
Quantitative unit	ks

- Heads and membranes from PTFE are suitable for aggressive substances
- Self-dessicative system ensures the offtake of condensate from the pump heads - power stay on the same level all the time
- Especially suitable for exhaustion of wet or heavy gases, for connection to vacuum ovens etc.
- Drying power can be set manually and has no effect on the pumps run
