Parameters

Pumping rate [l/min]	60
Threshold pressure [kPa]	0,2
Vacuum pump	N860.3FT.18
Quantitative unit	ks

- The ideal solution to the central vacuum in the laboratory

- Membrane air-pump designed for aggressive substances
- Separator with a condenser and vacuum regulator, which has not a function to find distillation point of exhaustion media
- It is possible to suitably install the station into the laboratory furniture and on the table put only the regulator
