Description

Rotační vakuová odparka

Quantitative unit

ks

Rotary vacuum evaporator RVO 004 is a cost saving variant of INGOS evaporators model line 400. Straightforward design of this evaporator consumes less space than the advanced models and has an easy to use analogue control of rotation speed and bath temperature.

Evaporating flask can be manually imersed by tilting or by vertical positioning with spring aid.

Standard glass assembly can be changed or enlarged upon request. Many configurations of the glass assemblies and wide range of reasonable glass parts and accessories are available.

Features:

Rotation speed: 20 - 140 rpm

Evaporating flasks: 20 ml - 4000 ml

Temperature range: max. 100 °C

Temperature accuracy: ± 5 °C

Condensing surface: 1200 cm²
