The Susie and Simon intraosseous leg simulates that of a newborn. A replaceable tibial bone lies under a smooth outer skin. It includes anatomic landmarks for teaching intraosseous access and infusion. A femoral vein/artery pair and an intramuscular injection site are included.

- Intraosseous vascular access
- 16 interchangeable, realistic tibial bones
- Realistic "pop" as needle penetrates cortex and enters bone marrow
- Blood return upon successful entry
- Infusion of fluid/medications
- Easily replaceable skins and veins that withstand multiple needle sticks
- Mounted on smoked Lucite base and supplied with blood bag and stand, synthetic blood concentrate, squeeze bulb, and spare leg skin
- Soft carrying bag
- Instruction manual
