Airway Management Trainers Life/form® Advanced "Airway Larry" Airway Management Trainers offer tongue swelling and laryngospasm in addition to all the features on the standard models. Your students can now be presented with these additional challenges they may face in the real world. Applying pressure to the cricoid cartilage changes the position of the trachea and closes the esophagus allowing realistic practice of the Sellick maneuver. With its slightly anterior position, swelling tongue, and vocal cords, the Advanced "Airway Larry" is a great trainer for introductory as well as advanced training.

Can be attached to either the Life/form® CPARLENE®, nonmodular Resusci® Anne™ brand CPR manikins or Life/form® Adult CRiSis™ Manikins.
