Construction

Child manikin

Quantitative unit

ks

This jaw thrust capable pediatric manikin offers you another option for teaching health care professionals. You will find all of the same features of our regular Kyle manikin with the addition of this simple rugged construction technique for instructing the procedure of moving

the jaw and tongue out of the way without moving the head. Two-rescuer technique allows you to ventilate the patient without lifting the jaw, although that maneuver also functions with JT Kyle. Manikin comes with three face pieces, three airways, and carry bag.
