Parameters

Quantitative unit

ks

Table surface is made from stainless steel removable tray. The working height could be set between 80 and 120 cm and desk could rotate. The height and rotation could be adjusted manually after release of the foot pedal. The foot pedal fixes the position of the table after adjustment. In tables having gas spring, release with foot pedal slowly move the tray upwards and the optimal position (height) is fixed with the pedal push. These products are antistatic. Tables are also available in cheaper non-antistatic design. Dimensions: l x w x h = 73 x 53 x (80 - 120) cm.
