ks

This model shows the detailed structure of a single flower with its pollination mechanism (magnified approx. 15 times). For purposes of better illustration, it is possible to detach the detailed model into four components. The typical barrier mechanism can be moved mechanically.

- **Dimensions:** 18 × 28 × 30 cm

Labiates (Lamiaceae)

The four sided stalks and the lip shaped flowers are characteristic of the labiates species. Labiates often are spice, perfume or medicinal flowers.
