Parameters

Quantitative unit ks

Our AirSim® model is ideal for training in airway management and awake fiberoptic intubation. It features the uniquely constructed AirSim® airway for realistic feedback during airway management procedures. Visually and anatomically correct, the nasal cavity and airway include important internal landmarks for training in nasotracheal intubation and nasally directed fiber optic examination.

Model Features

- Innovative AirSim® airway and nasal cavity created from CT DICOM data
- Anatomically correct internal features and visually accurate landmarks in airway & nasal passage
- Inflatable tongue with lifelike texture can simulate edema
- Replaceable lung bags inflate with successful ventilation
- Esophagus and replaceable bag representing stomach

Medical Procedure Training

- Single nasotracheal intubation

- Full range of supraglottic device insertion
- Direct laryngoscopy
- Fibre optic intubation & examination
- Endotracheal tube insertion
- Combi tube insertion
- Nasogastric (NG) tube insertion techniques
- Single lung isolation techniques

Package Contents

- 1 Carrier Case
- 1 Bottle of TruCorp Lubrication
- 3 Adult Lung Bags replicating 2 lungs & stomach
- 2 sets of adhesive pads (attachable to suction cups for increased stability if required)

Parts & Accessories

- Base Plinth
- Neck Locks
- Suction Cup (Set Of 8)
