## Urra Splint - size M (460 × 5 × 108 mm)

Order code: **4410.JM90001A**

Information about product price on demand

This particular immobilization system has exceptional characteristics. A thin layer of aluminium is covered with expanded closed cell polypropylene, impermeable to fluids and blood, and is X-ray compatible.

When it is longitudinally nerved, the splint becomes a semi-rigid support for the distal parts of the limbs. The surface is soft and sufficiently resistant to be sanitised and re-used over and over again. Thanks to its small size, it can be placed inside all types of first aid kits. Available in different sizes.

- **Functioning temperature:** from -10 to +55 °C
- **Storage temperature:** from -20 to +60 °C
