Bushings

Spencer has chosen an essential line for the highly versatile Rimac, that can also be anchored to lateral pockets on trousers or to other attachments on back packs or bags, thanks to the acetylic resin spring catch. What makes the difference with this small holder is above all, the finishing: the lateral panels contribute to improving the shape while the reflective details used give improved visibility.

- Four pen holders
- Central pocket with base strengthened with polypropylene tape for either mobile phones or radios
- Frontal expanding pocket
- Body in Cordura 600 D
- Frontal pocket in nylon Ripstop
- Posterior rotating spring catch in acetylic resin
- Posterior and upper borders to give increased resistance
