

MW34 - Obstetric Examination Simulator

Order code: **4103.MW34**

Information about product price on demand

Parameters

Obstetrics, gynecology - filter

Quantitative unit

Examination trainers

ks

Fundamental examination skills for prenatal checkup including palpation, fetal heart auscultation, and abdominal measurements

Accurate landmarks and realistic feelings

Anatomically correct landmarks of pelvis and fetus. The innovative tissue material provides realistic tactile feeling.

Share the sound with external speaker

Fetal heart sound and umbilical blood flow can be heard from external speaker. Remote control for volume and heart rate settings.

Maternal body measurements

Anatomically correct landmarks include pubic symphysis, navel, xiphoid process, iliac crest, and the greater trochanters.

Palpation
