Parameters

Animal species	Mammals
Quantitative unit	ks

The Bovine Injection simulator is a one-of-a-kind teaching tool used for teaching proper cattle injection techniques, ear tagging and growth implant basics. This life-sized simulator can be used to practice jugular injections and IV administration, intramuscular injections, subcutaneous injections, ear tagging and growth implant placement. It features a pulse in the jugular, a realistic hide and muscle feel as well as a removable training cover that maps out specific body landmarks for proper injections.
