#### Parameters

Quantitative unit

ks

- Detailed description
- Anatomically correct model
- Simulated teeth and bone are surrounded with soft rubber gums, complete with periosteum and periodontal ligament
- Allows for practical simulation including nerve blocks, luxation, elevation and extraction of any tooth, as well as tongue, epiglottis, esophagus and trachea to allow for intubation training
- Maxilla and mandible are easily replaced
- Model comes with one radiodense, extraction jaw set allowing for visualisation using radiography techniques prior to, and after, tooth extraction
- Clamp and arm for securing model to table is included

Package: Price Available upon request

- Canine dental model in either brown or black
- Three replaceable extraction/x-ray sets
- Carrying case with custom foam inserts
- Clamp and arm for securing to table
- BONUS clear jaw set

Jaw set consists of one mandible and one maxilla

Canine skulls are sold separately
