Parameters

Nursing simulators - filter	Adult
Quantitative unit	ks

The Lifecast Body Simulation 'Vivian' Senior Manikin represent a highly accurate Lifecast 82 year old female adult body designed and manufactured in the UK. Lifecast Seniors feature lifelike fine details such as replication of veins and underlying structures as well as hair and includes an airway and articulated mouth for airway management. Available in a wide range of ethnicities and created with the weight and height of an average Senior, this will encourage more natural handling, bringing a new level of realism to medical training.
