Durable and affordable, the Swab Test Training model is perfect to train healthcare students and staff on the performance of nasopharyngeal swab testing for the diagnosis of COVID-19, the flu, and other respiratory infections. The model features openings to the sculpted nasal and oral cavities. A nasopharyngeal swab can be passed through the nasal passage, and a standard tongue depressor can be inserted into the mouth to depress the fleshlike tongue and demonstrate strep testing. The see-through Plexiglas cover enables viewers to

watch as procedures are demonstrated. A must-have educational resource that is ideal for training as well as for test demonstrations in clinics, test sites, public health facilities, doctors' offices, and more. (Swabs and tongue depressors are not included.)
