### Parameters

Cannula, injection, puncturing - filter

Lower limbs

Quantitative unit

ks

The TruInfant IO Leg is a realistic task trainer for practicing the skills associated with intraosseous (IO) infusion of the tibia. This model is based on a 5-month-old infant.

Featuring realistic anatomy including the tibial tuberosity and patella, users can identify the proximal tibia intraosseous needle insertion site. Learners benefit from lifelike resistance when penetrating the medullary cavity.

**Features and Benefits:**

- Realistic: Features realistic anatomy including the tibial tuberosity and patella. Learners can identify the proximal tibia intraosseous needle insertion site
- Lifelike training: Lifelike resistance when penetrating the medullary cavity
- Positive user feedback: Confirm successful technique by withdrawing blood
- Ready-to-use: No set-up required! Begin training immediately using IO inserts pre-filled with blood
- Interchangeable: Replacement IO insert is quick and easy to replace with no disruption to teaching time
- Transportable: Delivered in a durable carrycase for easy transportation and safe storage

**Medical procedure training:**

- Identification of proximal tibia intraosseous needle insertion site
- IO tibia needle placement
- Aspiration of marrow blood through syringe
- Recommended equipment size: Size 18G needle

**Package contents:**

- Model is delivered in a durable carry case for easy transportation and safe storage.
- 1x TruInfant IO Leg training model
- 4x IO Tibias (1 attached & 3 spares)
- 3x tibia insert connector pins (long)
- 3x tibia insert connector pins (short)
