The DM 400 is the new comfort model for fine grinding of medium-hard, hard and brittle materials down to 0.05 mm. This model is based on the well-proven DM 200 but offers improved safety features due to the automatic locking of the collecting vessel and grinding chamber, as well as particularly convenient operation thanks to the motor-driven grinding gap adjustment with digital gap display. The clearly structured display shows all grinding parameters.

**Material feed size:** < 20 mm

**Final fineness:** < 50 µm

- excellent crushing performance

- convenient grinding gap adjustment in 0.05 mm steps - with digital gap display
- TFT display with robust membrane keyboard
- large, removable plastic funnel with smooth inner surfaces for easy cleaning and optimum material feeding
- wear compensation of grinding disc thanks to zero point adjustment
- Smooth inner surfaces of grinding chamber allow for easy and residue-free cleaning
- additional labyrinth sealing seals the grinding chamber
- easy change of grinding discs
- optional version with polymer interior coating
