

DW-HW138 Ultra Low Temperature Laboratory Chest Freezer

Order code: **2203.DWHW138**

Information about product price on demand

Parameters

Device type	Freezer
Description_	4 wheels
Volume brutto	138 l
The temperature range in the freezer	-40 až -86°C
Number of sockets	-
Defrosting	manual
Refrigerant	mixed gas
Quantitative unit	ks

The digital temperature display can show various parameters simultaneously, such as temperature inside the cabinet, power voltage and environmental temperature, indicating operating status clearly. The high-precision microcomputer temperature control system. The well-developed alarm system has multiple alarm functions: high temperature/low temperature alarm, door ajar alarm, power failure alarm, sensor failure alarm, low battery alarm, alarm of poor heat dissipation of condenser, system failure alarm, etc. The keyboard lock function and password protection function can prevent any adjustment of operating parameters without permission.
