- Detailed description

The products have been developed to give protection down to minus 160°C against freezer burn and frostbite. Waterproof gloves are also suitable for retrieving from liquid nitrogen vapours.

The products are manufactured from a highly efficient Poly-olefin insulation with an outer nylon skin which is laminated to a micro porous film. This makes the products very flexible in use and water resistant. In addition all the seams are double stitched for added strength. Long-life stress areas are triple stitched.

The products should not be used or worn near an open flame or in a hazardous area where ignition could occur. Gloves must not be immersed in liquid nitrogen.

Compliant with EN 420, EN 388, EN 342, EN 511, EN 340
