PCA2 - Portable coulometric analyser

Order code: **0206.PCA22024**

Information about product price on demand

Parameters

Quantitative unit

ks

Portable Coulometric Analyser PCA2 is designed for laboratory and field analysis of heavy metals, semi-metals and numerous non-metals in aquatic solutions for a broad concentration range addressing contents from sub- $\mu\text{g/L}$ up to several g/L . In battery operation mode it is well suited for field applications. The analysis is full automatic, the sample solution is transported to the electrochemical measuring cell by means of a small but robust peristaltic pump and on completing the analysis the result is displayed and stored in the memory.

Typical analytes:

Ag, Ammonia, As, Bromates, Bromides, Cd, Chlorides, Chlorites, Co, Cr(VI), Cu, EDTA, Fe, Hg, Iodides, Mn, Ni, Nitrites, Pb, Sb, Se, Sulphites, Sn, Sulfides, Tl, Zn
