Parameters

Quantitative unit ks

Control the bleed task trainer. Realistic and functional. With adjustable difficulty.

Made out of prosthetic grade silicone and 3D printed parts. Can be used for both wet and dry training. The blood flow speed can be easily adjusted.

**LEARNING OBJECTIVES**

## **Use it to teach:**

- wound packing
- hemostatic devices application
- tourniquet application
- improvised tourniquets
- itclamp application
- using a foley catheter to stop the bleeding in the neck area

## **Main Features**

### **hand-made with attention to details**

Each wound was carefully copied from real-life examples.

### **bleeding neck**

compatible with ITClamps and Foley catheters

### **adjustable blood flow**

The blood flow speed can be easily adjusted to the training needs.

### **stable base**

We added a stable base that mimics a shoulder joint to make the training more realistic.

### **hand-made with attention to details**

There are three bleeding points in the tourniquet application arm in the place of brachialis, superior ulnar collateral and profunda brachii arteries.

## **Box contents**

- wound packing arm
- tourniquet arm
- bleeding neck
- fluid container & tubing
- absorbent cloth
- silicone pad
- USBwith instructions
- carry bag
