Parameters

The Life/form® Simulated Burns Complete Set has been developed to assist with simulating burn injury types, patient assessment, and care.

Use assessment findings to identify the burn severity and type to prepare a treatment plan and to measure performance of burn management.

The simulated burns are pliable and can easily be cut into any shape to fit on a human patient, patient simulator, or trainer. The pieces are reusable and come ready to wear.

Theatrical makeup and simulated blood may be applied to add color for realism.

Complete set includes arm burns, leg burns, face burn, and chest burn.
