**LVP-10-L - Large Venipuncture Pad
(4x8x1) - Light Tone**
Order code: **4129.LVP10L**

Information about product price on demand

Parameters

Cannula, injection, puncturing - filter

Puncture, anesthesia, injections

The ultrasound-compatible Large Venipuncture Pad is perfect for practicing venipuncture or peripheral catheterization. The tissue pad includes three various-sized veins filled with simulated red fluid. Available in Light, Medium, and Dark Tones.

Includes:

- Large Venipuncture Pad 8 oz.
- Arterial Fluid (red) (MA-16)
- Luer Lock Syringe and Luer Lock tips to refill vessels

Features:

- Ultrasound-compatible soft tissue
- Three differently sized veins in a double-sided pad
- Veins are slightly visible through the skin surface on one side and obscured by a thick tissue layer on the other side to simulate various levels of complexity.
- Vessel depth is 7.65 mm on the shallow side and 17.75 mm on the deep side
- Durable, self-sealing tissue that when viewed under ultrasound, does not show needle tracks
- Easily refill vessels for multiple uses

Skills:

- Obtaining intravenous access
- Catheter insertion into a peripheral vein
- Ultrasound-guided vessel identification
