## BMT-10 - Block Move Task

Order code: **4129.BMT10**

Information about product price on demand

Parameters

Quantitative unit

ks

The Block Move Task is a proficiency-based task designed to teach the technical skills required in basic laparoscopic surgery. The user lifts each block by supinating the wrist and placing a curved needle within the metal ring attached to the block. The block is then moved 15 cm to the drop-off location. Use with any of Simulab's Laparoscopic Trainers, or secure to a table for use in the classroom, clinic, home, or office.

**Features:**

This task includes a Right and a Left-Handed Template along with proficiency metrics for self-assessment or skills lab.
