The Checkerboard Task is a proficiency-based task designed to teach the technical skills required in basic laparoscopic surgery.

Sixteen (16) letters and numbers are placed at the inferior border of the template. Using either one or two Maryland Graspers, a letter or number is grasped and moved to the corresponding space on the template. Use with any of Simulab's Laparoscopic Trainers, or secure to table for use in the classroom, clinic, home, or office.

**Features:**

- This task includes letters, a template, and proficiency metrics for self-assessment or skills lab.
