SNMR-21 - SonoMan Renal Training Module v2.1

Order code: **4129.SNMR21**

Information about product price on demand

Parameters

Phantoms and simulators

Ultrasound phantoms software

The Renal Module for the SonoMan® System Diagnostic Ultrasound Trainer allows students to learn the basics of identifying hydronephrosis or bladder distention. The use of renal ultrasonography allows clinicians to easily and rapidly obtain evidence for or against high-grade obstruction, thereby expediting decisions regarding management and disposition.

The Renal Module includes a mentor, student, and instructor mode. In Mentor mode, the user has access to an annotated version of each image. Instructor mode allows the instructor to include additional annotations for advanced learning. The image and video library include representations of two normal patients and three abnormal patients where abnormalities can be diagnosed.

Note:

- This is a software module for the SonoMan Diagnostic Ultrasound Trainer (sold separately). The module is not a stand-alone product. Contact your Account Representative to learn more.
- PC not included

Includes:

- Renal Software Module

Features:

- Transverse and longitudinal viewing
- Five targets in each viewing window
- Abnormal and Normal images
- All images and videos are of actual patients
- Mentor mode allows users to activate the onscreen labels of any of the digital images
- Each module includes an instructor (teaching) and student (exam) mode

Skills:

- Read diagnostic ultrasound imaging
- Identify external and internal landmarks
