Pit bull is the shortened name for the American Pit Bull Terrier, although it is often used to refer to other terrier mixes (for example, the Staffordshire Bull Terrier). Bred and valued for its tenacious grip, the pit bull is a powerfully built dog, with strong jaws, a thick, muscled neck, and impressive chest. If raised with care, the pit bull is a loyal guardian and good-natured family pet. Its height ranges from 18-22 inches and its weight most commonly falls between 35 to 55 pounds.

2-part skull (separate cranium & jaw)
