The Practi-Blood Bags (all types) for clinical training simulates a 450mL blood bag of red blood cells (300 mL of blood in a 450mL bag). Using the Blood Bags, users/practitioners can properly read a blood bag including the bar codes and blood type, as well as how to properly spike a blood bag.

The Blood Bags Offer Essential Learnings In:

- Developing technical skills related to the setup, inspection, and transfusion process using simulated blood bags.
- Gain knowledge of different blood components, such as red blood cells, plasma, and platelets, and their roles in patient care.
- Practice accurate and timely documentation of blood transfusion details, including start times, blood types, and any observations.
- These simulated Blood-Bags contribute to the development of competence and confidence in managing blood-related procedures.

Each Practi-Blood Bag comes with 8 interchangeable blood type stickers.

Qty: 1 bag + 8 blood type stickers

Product Content: Distilled water & colorant

NOT FOR HUMAN OR ANIMAL USE. FOR TRAINING PURPOSES ONLY.
