The Amber IV bag covers are used in hospitals to help reduce potentially harmful light effects in IV drug delivery. Add this to your curriculum for a perfect IV administration simulation for your nursing, pharmacy, EMT or other allied health skill laboratories. Each EPS amber IV bag cover fits both our 500mL and 1000mL Practi-IV bags.

The IV-Bags Optimizes Users Proficiency in:

- Practicing handling and setting up of IV bags
- Understanding and adhering to established protocols and guidelines for IV therapy.
- Learning the correct procedures for hanging, priming, and adjusting the flow rate of IV bags.
- Developing safe handling techniques for IV bags, minimizing the risk of errors or contamination.
- Simulating patient interactions related to IV administration, fostering communication and bedside manner.
- Enhance critical thinking skills by making decisions related to IV therapy based on simulated scenarios.
- Practicing management and adjustment the flow rate of IV fluids according to prescribed guidelines.
- Learn to document relevant information, such as start times, flow rates, and observations during IV administration.
- Simulating responses to potential emergencies or complications related to IV administration.

Note: The Amber IV bag cover is sold separately from the Practi-IV bags.
