The Practi-Albuterol Sulfate 0.083% Nebules simulates 2.5 mg/3 mL of Albuterol Sulfate 0.083% (Proventil®), a bronchodilator in a nebulizer. Albuterol comes as a liquid solution that is to be inhaled by the patient's mouth using a special nebulizer. This product is thus designed to safely teach this skill using with any task trainer or manikin that accepts distilled water. Users/practitioners can also practice dosage calculations to understand the different dosages for adults versus pediatrics.

Distinctive Skills the Nebules Teaches:

- Asepsis during the use of a nebule and nebulizer
- Techniques in connecting and positioning the nebulizer
- The accurate measuring of prescribed dose from the nebule
- Observing the specific precautions accompanying the use of a nebule/nebulizer

Qty: 30 nebules

Product Content: Distilled water

NOT FOR HUMAN OR ANIMAL USE. FOR TRAINING PURPOSES ONLY.
