The Practi-Vial 10 mL Tint , for clinical training, is an amber glass vial that perfectly simulates light-sensitive vials that are often used in hospitals and clinics. The vial provides users the opportunity to learn the sterile techniques of large vial handling, air replacement, dosage aspiration and needle withdrawal. A variety of simulated drug scenarios can be demonstrated with this vial trainer.

The 10 mL Tint vial is filled with 10mL of distilled water, is safe for use with Manikins and is ideal for skills training for nursing, EMS and pharm tech programs.

This product is compatible with our Practi-Midazolam HCl label and Practi-Nitroglycerin label.

Qty: 30 vials

Product Content: Distilled water

NOT FOR HUMAN OR ANIMAL USE. FOR TRAINING PURPOSES ONLY.
