The Wearable Avulsion Wound is an innovative simulation device specifically designed to replicate avulsion wounds. Its primary objective is

to educate students on the proper techniques for managing and dressing avulsion injuries.

The wearable design of the Avulsion Wound allows for direct interaction with the simulated avulsion wound, providing a practical and immersive learning experience.

Our new system of attachment will help the users to adjust the simulator tight and comfortably on the body.

In summary, the Wearable Avulsion Wound is an exceptional training tool that offers a high level of realism and usability. With its avulsion-specific design and two attachment options, it provides a comprehensive training experience for individuals looking to enhance their management and dressing skills for avulsion injuries.
