Prestan Professional Ultralite with electronic feedback - 4 pack

Order code: **4115.PPULM400MMS**

Cena bez DPH	663,00 Eur
Price with VAT	802,23 Eur

Parameters

Construction	Adult torso
Quantitative unit	ks

Prestan Ultralite figures are very easy to assemble and for your convenience they come in a lightweight package for effective "on the move" training. This manikin is an affordable manikin for CPR training. It is as high quality and realistic as other Prestan models.

Features:

- Uniquely fast and easy commissioning
- Torsos and heads fit together to save space in the carry bag
- The "V" opening makes access to the dummy very easy
- The dummy is easy to clean
- Vinyl and latex-free
- Compatible with AED trainer electrodes
- Anatomically accurate design including sword-like protrusion
- Realistic head tilt
- Visible chest rise during ventilation due to lung bag
- Realistic chest detail

- Realistic chest compression to full depth of 5-6 cm
- Tested for durability, can withstand up to 500,000 compressions
- Electronic feedback of compression rates

Electronic feedback

Visual feedback from the CPR Feedback Piston gives students a real feel for performing 100-120 compressions per minute.

Instructors can quickly and easily monitor multiple students. When performing CPR slower than 100 compressions per minute, a red LED light comes on to alert the student that they are not performing compressions fast enough. When performing compressions in the range of 100-120 compressions per minute, the LED light will turn solid green, letting them know they are within the ideal compression rate range recommended by the guidelines. The flashing red light signals the student to slow down when they exceed 120 compressions per minute.

In addition to the visual CPR rate monitor, students will also hear a clicking sound when the chest is compressed to the appropriate depth of 2.0 -2.4 inches, allowing them to experience the actual force required to perform real chest compressions.

Sleep Mode/No Power	
1st Full Compression <small>[Wake mode/LED Test Mode, Cycles in sequence]</small>	
CPM* < 100	
CPM* 100 – 120	
CPM* > 120	

*CPM = Compressions per minute

 = Flashing

Further details:

For CPR instructors who appreciate lightweight, portable products with easy setup and intuitive feedback, the PRESTAN Ultralite series is the ideal solution! Stackable torsos and heads create a compact portable solution for transporting multiple units in packs of 4 (13 kg) or 12 (39 kg).

Includes

- 4 Complete Ultralite Manikins
- 4 CPR Feedback Pistons
- 50 Ultralite Face-Shield/Lung-Bags
- Carry Bag
