VR Training for Nurses

Order code: **4514.Nursing**

Information about product price on demand

Parameters

Quantitative unit

ks

SimX is revolutionizing the education of nurses and nursing students through immersive and interactive virtual simulations. This advanced platform allows for the realistic simulation of a wide range of clinical scenarios, from routine nursing procedures to the management of complex health conditions and emergency situations. Users have the opportunity to practice key skills such as communication, teamwork, and decision-making under pressure, all in a safe and controlled environment that faithfully replicates real-world healthcare challenges.

It includes scenarios focused on the care of pediatric and geriatric patients, emergency medicine, critical care, and routine treatments. The simulations allow nurses and students to face real-life issues, such as cardiac arrests, respiratory failure, diabetic conditions, sepsis, or complicated deliveries, thus improving their clinical skills under controlled conditions.

Example A

Simulation for every course?

- 1× Health Assessment
- 1× Fundamentals
- 4× Med - Surg
- 3× Maternity
- 3× Pediatrics
- 2× Mental Health
- 2× Population Health
- 2× Leadership

Example B

Clinical placements?

- 10× Pediatrics
- 5× Maternity
- 5× Mental Health

Example C

Elsevier & SimX nursing curriculum

- 4× Health Assessment
- 11× Fundamentals
- 20× Med-Surg
- 20× Maternity
- 20× Pediatrics
- 10× Mental Health
- 14× Population Health
- 5× Leadership

Thanks to the ability to repeat scenarios, personalized approaches, and data-driven feedback, users can enhance their skills more efficiently than ever before. **SimX** also enables collaboration among multiple users simultaneously, fostering teamwork and improving communication between healthcare team members.

This platform is not just an educational tool - it is preparation for real-world practice, helping healthcare professionals gain the confidence and expertise needed to deliver top-notch patient care. **SimX** is the ideal solution for educational institutions, healthcare organizations, and individuals who want to take their skills to the next level.

In the attached PDF file, you will find a list of all simulations and cases from which you can create your own plan focused on a specific sector, or alternatively, select portions from each category to create a comprehensive course.
