GUNT SE 200.21 MEC

Is an intelligent, communication-enabled support designed for use with the SE 200 frame.

It enables precise measurement of forces and angles, making it an essential component for structural mechanics experiments.

Key Features:

- **Smart Measurement Technology:** Integrated electronic module for data acquisition and direct measured value display.
- **Flexible Installation:** Can be mounted horizontally or vertically using a quick and secure click system.
- **Automatic Identification:** The system automatically detects and assigns the support during setup and experimentation.

- **Force and Angle Measurement:** Measures forces in both x and y directions and records the angle for precise analysis.
- **Seamless Integration:** Quick-release fastener allows for easy installation in the SE 200 frame without the need for cables.

Technical Specifications:

- **Installation Positions in SE 200 Frame:** 10
- **Connection Points:** For attaching bars and other accessories
- **Measuring Ranges:**
 - Force: 2x 0...200N

Dimensions and Weight:

- **Storage System (LxWxH):** 600x400x200mm
- **Weight:** Approx. 5kg

Required for Operation:

- Compatible accessories from the GUNT MEC Line series
