GUNT SE 200.02 MEC

Designed for the GUNT MEC Line, this accessory allows students to study the principles of statics and strength of materials by simulating a parabolic arch bridge.

Key Features:

- Parabolic Arch Model: Enables the study of internal forces, reactions, and deformation under various loads.
- Smart Components: Includes communication-enabled components for real-time data acquisition and visualization.
- Quick Setup: Uses a click system for quick, tool-free assembly.
- GUNT Software Integration: Allows for detailed analysis and visualization of experimental data.

Technical Specifications:

- Materials: High-quality stainless steel for precision and durability.
- **Dimensions**: Fits within the SE 200 mounting frame for easy integration.

- **Power Supply**: Operates via a single power bus line.
- **Compatibility**: Compatible with other accessories in the GUNT MEC Line.
