### GUNT SE 200.04 MEC

This accessory is designed for studying friction on an inclined plane within the GUNT MEC Line. It allows experiments on sliding and static friction between different material pairs at adjustable incline angles.

#### Key Features:

- **Adjustable Incline Angle:** Allows simulation of various friction conditions.
- **Various Material Pairs:** Tests sliding and static friction between different material combinations.
- **Compatibility with GUNT MEC Line:** Easily integrates with other GUNT MEC Line components for comprehensive experiments.

#### Technical Specifications:

- **Materials:** High-quality components ensuring durability and measurement accuracy.
- **Dimensions:** Compatible with the SE 200 mounting frame for easy integration.
- **Power Supply:** Operates via a single power bus line.
