Parameters

P73 - Airway Management Trainer

Accuracy, confidence, and a calm mind are critical in life-threatening situations. The 3B Scientific Airway Management Trainer allows you to train students and healthcare professionals effectively, enabling them to react quickly, use their expertise, and save lives in critical moments.

Why P73?

- Anatomically accurate airways
- Features like main stem and gastric insufflation
- Visual and auditory feedback for potential tooth damage during intubation
- Bronchoscopy training with optional 4th-order bronchial segments for more realistic simulation
- Training with devices like iGel, LMA, ETT, NGT

Training Options

The model simulates the human head's weight and feel, allowing for mastery of key techniques like head tilt, jaw thrust, and accurate airway device use.

It supports a wide range of procedures including:

- Bag-Valve-Mask (BVM) ventilation
- Endotracheal intubation
- Use of supraglottic airways
- Oral and nasal intubation
- Nasogastric tube placement
- Esophageal intubation and gastric insufflation
- Bronchoscopy

Anatomy

The model's design includes:

- Tongue
- Nasopharynx and oropharynx
- Epiglottis and vallecula
- Thyroid cartilage and vocal cords
- Trachea, lungs, esophagus, and stomach

Safety Focus The upper teeth design allows for observation and minimalization of potential damage during laryngoscopy.

Whether you're training in a simulation center, mentoring medical students, or leading healthcare educator workshops, the 3B Airway Management Trainer provides a safe environment for airway technique practice.

Invest in the P73 and equip your team with the skills needed to save lives!
